

DANIA YASIR MUTASIM

JUNIOR MACHINE LEARNING ENGINEER

Cairo, Egypt | WhatsApp: +20 115 590 2291 | daniathefirs@gmail.com
[LinkedIn](#) | [GitHub Project](#)

PROFESSIONAL SUMMARY

Artificial Intelligence Engineering undergraduate and current Machine Learning intern with hands-on experience in Python-based data preparation, feature engineering, classification, model evaluation, and interactive dashboard development. Skilled in translating data into practical business insights using Python, Excel, Power BI, Power Query, DAX, and basic SQL. Demonstrated analytical rigor by detecting data leakage and redesigning evaluation workflows to protect result validity.

EXPERIENCE

Machine Learning Intern - FlyRank AI | Current | Three-month internship

- Analyze anonymized search-performance data to identify pages at risk of a meaningful decline in impressions and support review prioritization.
- Prepare data, engineer features, define classification targets, and evaluate models using leakage-aware validation and balanced performance metrics.
- Detected a data leakage issue that inflated model results and revised the workflow to produce honest, reproducible evaluation outcomes.
- Document experiments and recommendations in Python notebooks and manage project work through Git and GitHub.

SELECTED PROJECTS

Search Impressions Decline Risk Model | Python | pandas | scikit-learn | GitHub

- Built an end-to-end classification workflow to score and rank pages by risk of a substantial second-half decline in search impressions.
- Performed data preparation, feature development, class-distribution checks, model evaluation, and leakage investigation; communicated limitations clearly.

Sales & Marketing Call Center Dashboard | Power BI | Power Query | DAX

- Analyzed approximately 200,000 calls and created interactive measures for call volume, answer performance, conversion patterns, and team productivity.
- Designed filters and KPI views that convert operational data into clear, decision-ready insights for managers.

Sales Performance Dashboard | Excel | Power Query | PivotTables | PivotCharts

- Cleaned and transformed sales data, then built an interactive dashboard to monitor revenue trends, product performance, and core sales KPIs.
- Structured the reporting workflow for repeatable refreshes and clear communication of business results.

EDUCATION

Bachelor of Science in Artificial Intelligence Engineering | Arab Open University (AOU) | Current student

TECHNICAL SKILLS

Machine Learning: Supervised classification, feature engineering, target definition, model evaluation, data leakage detection, class imbalance awareness

Programming & Data: Python, pandas, scikit-learn, basic SQL, data cleaning, exploratory data analysis

Analytics & BI: Microsoft Excel, Power BI, Power Query, DAX, PivotTables, PivotCharts, dashboard design, business insights

Tools: Git, GitHub, Jupyter/Google Colab

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (AI-900)

Microsoft - Apr 2026

Stay Ahead of the AI Curve

Google - Jul 2026

Discover the Art of Prompting

Google - May 2026

Claude 101

Anthropic

Google AI Essentials V1

Coursera - Jul 2026

Use AI Responsibly
